**GRAHAM LANGAN: THE 6'0", 183-POUND PERFECT GAME & PBR-RANKED OUTFIELDER WITH POWER, SPEED, AND A BIG ARM FROM CHEROKEE HIGH SCHOOL**

By [BoggsBaseball.com](https://BoggsBaseball.com) Staff Writer Ariel Lewis

January 2026

In Georgia's talent-rich 2028 class, **Graham Langan** has emerged as one of the most physically advanced and rapidly ascending young outfielders. Ranked by both **Perfect Game** and **Prep Baseball Report**, the Cherokee High School standout has developed into a high-ceiling prospect defined by **explosive bat metrics, legitimate athleticism, and a next-level outfield arm**.

At **6'0", 183 lbs**, Langan brings the frame and tools of a future middle-of-the-order bat. His **94 mph exit velocity, 6.80 speed, and 86 mph outfield arm** make him one of the more complete outfielders in his class — a rare blend of strength, speed, and projection that colleges value heavily.

#### THE BAT: POWER EMERGING EARLY — 94 MPH EXIT VELOCITY

Langan's bat is his calling card, and the numbers tell the full story.

His ability to produce **loud, consistent contact** with upper-tier bat speed has quickly elevated him onto recruiting boards.

#### Updated Hitting Metrics

- **94 mph exit velocity (max)**
- **High-level bat and hand speed**
- **Consistent hard-hit rates**
- **Efficient, explosive rotational movement**

He hits with controlled aggression, stays inside the ball well, and drives it with authority. The ball comes off his bat differently — sharp, loud, and rising.

#### Scout Comment:

*"Langan's 94 mph exit velocity at his age is exceptional. His bat speed and strength profile as future home-run power at the college level."*

#### ATHLETICISM: 6.80 SPEED WITH RANGE AND FLUID MOVEMENT

Now clocking at **6.80 in the 60**, Langan pairs acceleration with long, powerful strides that translate perfectly to outfield play.

- **1.60 10-yard quickness**
- **3.77 30-yard acceleration**
- **20+ mph running velocity**

He moves efficiently for his size, showing natural outfield range, body control, and closing speed. With continued growth and improved route discipline, he projects as a high-value defensive outfielder.

**Scout Comment:**

*"He's a fast, strong mover with true athletic upside. His 6.8 speed or better will play extremely well at the next level."*

---

★ **THE ARM: 86 MPH FROM THE OUTFIELD — BIG ARM UPSIDE**

Langan's most dramatic jump has come from the outfield, where he now touches **86 mph** with smooth mechanics and carry on his throws.

This arm strength is:

- **Above average for his class**
- **Highly projectable**
- **Sufficient for all three outfield positions**
- **Indicative of future upper-80s ability**

His arm action is loose and free, with natural whip — ideal traits for future development.

**Scout Comment:**

*"An 86 mph arm at his age is big. As he continues to build strength, this is easily a 90+ arm by his junior or senior year."*

---

★ **CHEROKEE HIGH SCHOOL'S NEXT ELITE OUTFIELD PROSPECT**

Cherokee High School consistently produces tough, athletic, college-caliber players — and Langan is shaping up to be the next in line.

What separates him is not just his current performance but his **trendline**:

- His metrics keep climbing
- His body continues to mature
- His power is increasing rapidly
- His arm strengthened significantly in a short timeframe
- His speed remains an asset at a stronger weight

Perfect Game and PBR recognize him for a reason:  
**He is one of the true risers in Georgia's 2028 class.**

---

#### ★ THE COMPLETE OUTFIELD TOOLSET

- ✓ Size: 6'0", 183 lbs — strong, athletic frame
- ✓ Power: 94 mph EV with lift and carry
- ✓ Speed: 6.80 with plus acceleration
- ✓ Arm Strength: 86 mph OF velo
- ✓ Defense: Projectable range and instincts
- ✓ Ranked: PG & PBR evaluations validate his profile

This is a player who brings a balanced combination of physicality and athletic sharpness.

---

#### ★ THE FUTURE: A HIGH-CELLING, COLLEGE-LEVEL OUTFIELDER WITH POWER POTENTIAL AND IF HE CONTINUES TO DEVELOP, HE CAN BE A POTENTIAL FUTURE COLLEGE MLB DRAFT CANDIDATE

If Langan continues along his current developmental arc, he projects as:

- A strong future college outfielder
- A middle-of-the-order threat with real power
- An athlete whose measurables will keep climbing
- One of the more exciting outfield prospects in Georgia's 2028 class

He has the size, the metrics, the work ethic, and the upward trajectory to become a high-impact player.

**Graham Langan's rise is only beginning — and the ceiling is high.**
